

# B&B'S NEW ATTACHMENT PROVIDES BUILDERS MERCHANTS WITH HANDLING VERSATILITY

Handling banded block packs without pallets can now be carried out quickly, safely and easily following the launch of a new versatile and flexible Kaup attachment from B&B Attachments, the UK's leading supplier of masts and forklift truck attachments. Called the Kaup 412VP, the clamp has block handling arms which can be slipped over the standard forks of the truck in a matter of moments so that block packs can be transported without the use of a pallet. Not only does this speed up delivery but also improves handling efficiency and saves costs on pallets and labour.

The Kaup 412VP is indispensable for transporting blocks, flags and bricks for loading whilst maintaining the availability of the standard forks for palletised loads. It reduces the costs associated with dispatching a pallet with every load, and as the clamp is able to handle a variety of load sizes, increases the versatility of the forklift.

Offering sideshift as well as fork positioning, the Kaup 412VP allows the placing of the forks outside the truck so that longer, wider loads can be better supported. The clamp provides excellent visibility for the lift truck driver, enabling loads to be moved quickly and easily. An essential addition for companies that transport blocks, the forklift can be changed from standard forks to block handling clamp in just 30 seconds.

A central pivot on the arm ensures that if a block pack has not been placed squarely on the truck, the clamp can rotate to avoid damage to the block pack. In addition, the arms have been coated with rubber to ensure that bricks, flags and blocks are not damaged when being handled.

Easy to service, the Kaup 412VP is backed by B&B Attachments' renowned after sales service and its fleet of nationwide service engineers. The block clamp is manufactured by KAUP GmbH & Co. KG, Europe's foremost producer of forklift attachments.

B&B Attachments is certain that this new KAUP 412VP clamp will become invaluable to builders merchants, DIY stores and pavior manufacturers for handling banded block packs. They will enhance the standard range of KAUP bespoke products currently available from B&B Attachments.

Established for over 22 years, B&B Attachments is the UK's leading independent supplier of forklift truck attachments and masts. From its sites in Hungerford, West Berkshire and Cramlington, Northumberland, the company operates the UK's largest fleet of service vehicles in the forklift attachment industry, handling site maintenance and repairs for a client base that includes OEMs, forklift truck dealerships and end users.
